Carol Plantations, Inc.

THEODORE, ALA.

Owning the largest combination orange and pecan groves and nurseries in the world.

JONATHAN BOURNE, Jr., Pres. & Gen. Mgr.
ARTHUR H. McCONVILLE, V-P. & Sec'y
FRANCES TURNER BOURNE, Vice-Pres.
ANSON W. PRESCOTT, Treas. & Supt.

Our orchards supply seed, budwood and graftwood for our nurseries, which fact assures our customers of PEDIGREED stock.

\$720 REVENUE FROM TEN PECAN TREES

(Nashville, Tenn., Banner, July 3, 1927)

The late N. D. Moon, of Swifton, Ark., planted 10 pecan trees 18 years ago "just for fun," he said. Last year Mrs. Moon gathered 800 pounds of nuts from these trees and sold the nuts at 90 cents a pound, which made \$720.

The little pecan orchard on the state highway has attracted the attention of thousands of people, and last year 10 pecan trees made more clear money than a big plantation of cotton across the road.

Orders accepted subject to cancellation if circumstances beyond our control prevent fulfillment.

State laws require that Satsuma trees be defoliated before shipping. Every tree should be pruned back before planting. For the convenience of our customers, to save express charges and to lessen the danger of injury to the trees, we will prune all trees ready for planting unless otherwise requested by the purchaser. Pecan trees taller than 6 feet will be cut to that height. The purchaser can easily cut them shorter if he so desires.

Our nurseries are regularly inspected by state entomologists and certified. We guarantee our trees to be true to variety, well dug, well packed and in good condition on arrival at destination. If not in good condition register complaint with transportation agent and notify us.

1929 - 1930 PRICE LIST

Owari Satsumas budded on Citrus Trifoliata.

These trees are not slender shoots, they are sturdy, well-branched trees 3 to 5 feet in height and bore fruit in nursery during past season. Save time by planting a large tree.

Caliper taken 1½ in. above bud.	Any quantity.
1½ to 5⁄8 in.	\$.20 each
5⁄8 to 3⁄4 in.	.25 "
3⁄4 and up	.30 "

Satsuma trees not calipered, 2 to 4 feet high, 20c each, \$15 per hundred. If Satsuma, Lemon or Grapefruit trees to be shipped by parcel post, add 5c per tree for postage. No order for Satsumas less than \$1.50 shipped.

GRAFTED PECAN TREES Stuart, Success, Schley, Pabst

Height above bud	Less than 10 lots	10 to 100 lots	100 and over
2 to 4 feet	\$.60 each	\$.45 each	\$.30 each
4 to 5 "	.70 "	.55 "	.40 "
5 to 6 "	.80 "	.65 "	.50 "
6 to 7 "	.90 "	.75 "	.60 "
7 to 9 "	1.00 "	.85 "	.70 "
Extra Large.....			\$2.00 each

Owing to cost of packing, no pecan order for less than \$4 can be accepted for shipment. Pecan trees cannot be shipped by parcel post owing to length. Measurements are above the ground.

Grapefruit or Lemons.....\$ 1.00
Trees bore fruit in nursery at two years.

ABELIA GRANDIFLORA BUSHES

Large five-year-old bushes, numerous branches, five feet tall, making fine appearance when planted, \$1.50 each, \$12 per dozen.

**WE RESERVE THE RIGHT TO CHANGE
PRICES WITHOUT NOTICE.**

No orders acknowledged without 25% cash deposit to insure acceptance of same, balance upon delivery. Prices F.O.B. Theodore. No charge for packing.

NOTE—See planting instructions on back.

PLANTING INSTRUCTIONS

If trees cannot be planted immediately upon arrival, a trench should be dug large enough to receive the roots, the trees taken out of the bundle, the roots placed in the trench with tops sloping toward the South, and the roots covered with soil enough to prevent getting dry. Water frequently while thus heeled in.

Get your holes ready before beginning to plant. Have the holes plenty large and deep. When ready to plant, take out only a few trees at a time and keep the roots moist and covered from the wind. All broken or injured portions of the roots should be trimmed to leave ends smooth. Trees should be planted about the depth they stood in the nursery. Spread the roots in a natural position, working under and around them fine top soil, rather than the soil that came out of the hole, and pressing the soil down firmly without bending the roots downward. When the hole is nearly filled pour in a pail or two of water to wash the soil against the roots, and then finish filling the hole with loose soil to serve as a mulch. We prefer putting fertilizer on top of the ground, around the tree, not closer than 8 to 10 inches, but some planters secure excellent results by digging the hole extra deep, throwing in three or four inches of well rotted manure, well mixed with soil, tramping it hard to exclude air, covering it with well packed soil and then planting the tree above that. Roots must not come in contact with strong fertilizer or they will be burned. Water the tree frequently in dry weather the first season, and keep the grass and weeds hoed away for a distance of at least three feet.

A pecan tree should be cut off about 5 to 6 feet above ground before planting. Our Satsuma trees are pruned ready for planting.

WEAVER ORCHARDS

Fowl River, Alabama, July 23, 1927

Carol Plantations,
Theodore, Ala.
Gentlemen:

The Satsuma trees we purchased of you this season—4500 in number—were so satisfactory that I take pleasure in advising you of the fact.

The growth and general behavior of these trees is proof of the vigorous and healthy condition of the stock as delivered from your nurseries. The root system was uniformly excellent and the tops clean and well shaped. You are rendering a real service to the Satsuma industry in producing trees of this type.

Yours very truly,

WALTER WEAVER, Mgr.

Grand Bay, Ala., Oct. 4, 1928.

Carol Plantations, Inc.,
Theodore, Ala.
Gentlemen:

I am pleased to advise you that all of the 355 pecan trees I purchased from you last winter are living and have made a splendid growth. Part of them were planted on old, cultivated ground while the rest of them were planted on newly cleared land.

Yours very truly,

T. J. WILLIAMS.
